## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 6 and 15 drawn to a one vessel cleaning method.

Group II, claim(s) 2 - 5, drawn to a two vessel cleaning method.

Group III, claim(s) 14, drawn to yet another method of cleaning.

Group IV, claim(s) 7-13, 21, drawn to a two vessel cleaning device.

Group V, claim(s) 16-20, 22, drawn to a nozzle operated one vessel cleaning device.

Group VI, claim(s) 23 - 25, drawn to a cleaning method by formation a cleaning mode inside the part or conduit to be cleaned.

2. The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Where the group of inventions is claimed in one and the same international application, the requirement for unity of invention referred to in Rule 13.1 shall be fulfilled only when

Art Unit: 1746

there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features. The expression "special technical features" shall mean those technical features that define a contribution which each of the claimed inventions considered as a whole, makes over the prior art. The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, although they share the special technical feature, this special technical feature does not define a contribution over the prior art for the following reasons: Claims 16-20 and 22 are either obvious or anticipated by any one of the following JP 7328857 or JP 7328855, each individually.

Claims 1 and 6 are obvious over JP 8-90418; Claims 2-5, 14 and 15 are obvious over JP 7328860; Claims 23-25 are obvious over JP 8-90418.

Accordingly, the special technical feature linking the inventions, collapsing impact force of the cavitation bubbles does not provide a contribution over the prior art, and no single general inventive concept exists. Therefore the restriction is appropriate.
